This is spectacular country, set against a backdrop of the mighty Mountain Ol Olokwe. The Samburu region is the best place to find several endemic Northern species, including Gerenuk, the Reticulated Giraffe, and Grevy's Zebra.

The Lake is also well populated with Crocodile. The lake itself is truly beautiful, surrounded by volcanic ranges that stretch as far as the eye can see. The 32 sq km lake is still volcanically active, and the Western shore is lined with spouting geysers, spurting steam and bubbling geothermal pools. Fresh water springs at the lake edge attract an abundance of birds and wildlife. There are many Fish Eagles, which often prey on the local flamingos. The shores are always lined with Gazelle, Zebra, Baboons and this is one of the best places to see Greater Kudu...

Lake Nakuru Thousands of flamingo, joined into a massive flock, fringe the shores of this soda lake. A pulsing pink swathe of life that carpets the water; the flamingo are a breathtaking sight. Both Black and White Rhino are found here, and are often seen resting under acacias by the Lake shore. The park abounds with game. After breakfast commence drive south to the Maasai Mara National Reserve to arrive for lunch at the respective Lodge/Camp. Late afternoon game viewing drive.

MARA SOPA LODGE / SEKENANI CAMP / MARA SAROVA CAMP (F/B).

South Western Kenya is the heartland of the Maasai. The Maasai are a strongly independent people who still value tradition and ritual as an integral part of their everyday lives. They regard themselves not just as residents of this area but that they are as much a part of the life of the land as the land is part of their lives.

Traditionally, the Maasai rarely hunt and living alongside wildlife in harmony is an important part of their beliefs. Lions and Wildebeest play as important a role in their cultural beliefs as their own herds of cattle. This unique co-existence of man and wildlife makes this Maasai land one of the world's most unique wilderness regions.
